

[name and address]

Results of your screening for breast cancer¹

Dear [name]

You have recently participated in screening for breast cancer. The x-rays from your examination has now been evaluated.

The x-rays show no sign of breast cancer.

If aged 50 to 69 years, you will be invited to screening for breast cancer again in approximately 2 years.

You should always contact your general practitioner if you experience any symptoms from your breasts. This also applies if you follow the screening programme for breast cancer regularly.

Yours sincerely,

[Relevant department]
