

[name and address]

## Results of your screening for breast cancer<sup>1</sup>

Dear [name]

You have recently participated in screening for breast cancer. The x-rays from your examination has now been evaluated.

The x-rays show no sign of breast cancer.

You have reported that you have observed a node in your breast. If you still feel this node we recommend that you consult your general practitioner. This also applies if you follow the screening programme for breast cancer regularly.

If aged 50 to 69 years, you will be invited to screening for breast cancer again in approximately 2 years.

**Yours sincerely,**

[Relevant department]
